Buffalo city directory
1873

ANNOUNCEMENT FOR 1873.

THE Publishers take pleasure in calling attention to the testimony furnished by the Buffalo City Directory for 1873, of the constant and healthy growth of the city. The Directory contains 39,320 names, against 36,828 in 1872, and on the basis of 4½ persons to each name, gives a population of 161,782, showing an increase in one year of 10,867. Long experience has demonstrated the comparative accuracy of the canvasses made for the Directory, and it may safely be claimed that the number of inhabitants is greater than above stated.

It will be observed that the Directory contains more than the usual amount of detailed information in regard to the municipal government and the public, religious, educational, charitable and private institutions of the city, which will be found valuable for the present as well as future reference.

The first Directory of Buffalo was published in 1828. None were printed in the years 1829, 1830, 1831, 1833, 1834, 1843, 1845 and 1846. We preserve the usual style of the book, which contains 670 pages, a decided increase over last year. The make up of our Directory gives advantages to advertisers in matters of reference in the indexes, far surpassing any other City Directory published.

Great care has been exercised in the compilation and arrangement of this edition, and we trust that it will not only acceptably serve its main purpose as a book of daily convenience to our citizens, but will encourage them to do all in their power to contribute to the prosperity of the city which, not many years hence, will boast of a population of a quarter of a million.

THE UNIVERSITY OF CHICAGO

BUFFALO CITY DIRECTORY.

BUFFALO.

ITS GROWTH—ITS PRESENT CONDITION—ITS FUTURE PROSPECTS.

IN presenting to the citizens of Buffalo our Directory for the year 1873, the publishers feel justified in again congratulating their patrons upon the evidences of the substantial prosperity and healthy growth of the city which they have encountered while compiling it. The annual canvass which is involved in the preparation of such volumes, affords the very best means of accurately determining the material progress of the city, and a full set of Directories necessarily contains an excellent epitome of its growth. The first Directory was issued in 1828, when Buffalo was a village of about 7,000 inhabitants, and the second one did not make its appearance till 1832, the year Buffalo became a city. It then had about 15,000 inhabitants, but had little or no commerce, or in fact, any other business to justify municipal honors. From that year Directories have been regularly issued, excepting in 1833, 1834, 1843, 1845 and 1846, so that a complete set embraces thirty-seven volumes. It is interesting and instructive to note the changes which these books record—the dropping away, from year to year, of the men who laid the foundations of the city, the failure of various enterprises supposed to have been fraught with vital importance to us, and the development of new ones which had not been conceived by the founders.

The census of 1830 showed a population in Buffalo of 8,700; in 1835 it contained 15,700; in 1840 it had reached 18,200; in 1845 the figures had swollen to 30,200; in 1850 to 42,300; in 1855 to 74,200; in 1860 to 81,130; in 1865 to 94,210; and in 1870 to 117,000. In compiling

the Directory for 1873 the canvass has been made with unusual care, and 33,320 names of householders and business men are given, which is an increase of 2,392 names over the Directory of last year. It is conceded by the best vital statisticians that the total population of cities may safely be estimated at four and one-eighth times the number of names embraced in such a canvass as we have just made. Upon that basis Buffalo must now contain at least 161,782 population, which would be an increase of 10,867 over 1872. At the same rate of increase the next State census—to be taken in 1875, our national centennary—will show a population of *two hundred and twenty-five thousand!* That it is safe to anticipate a verification of that calculation, there is abundant reason to believe. The growth of our city is now, and for several years past has been, remarkably healthy and rapid, especially in its suburbs. A ride through the eastern and northern portions of the city shows astonishing changes within the last year or two. Many thousands of new tenements have been erected, and hundreds of manufacturing establishments have been newly started. Most of those tenements have been built for occupancy by the laboring classes, and the manufactories are mostly upon a small scale: two facts which demonstrate most conclusively that our growth is legitimate, and that the foundations of our future municipal greatness are being laid broadly and permanently.

Buffalo is destined speedily to become a great manufacturing city. It already is so to a degree which is astonishing in view of the difficulties which we have had to overcome. Our greatest drawback has hitherto been a lack of capital for manufacturing enterprises. Our employers have had to compete with Commerce as borrowers, and the result has often been exceedingly unfavorable to the former. The struggle is, however, nearly ended. Our leading Manufacturers have already become strong and independent through accumulation, and hundreds of small ones are slowly going through the same process of financial growth. The day is not far distant when the combined manufacturing wealth of Buffalo will be stronger and more important than that of its commerce, and then we may expect a development of material interests which will be far more marvelous than any which the past has witnessed.

Our city already possesses, in an advanced state, all the essential elements of metropolitan success. We have a climate unsurpassed, for salubrity, in the United States; we have wide, well-paved, well-lighted streets;

we have an admirable system of sewerage; there is also reason to hope that we shall soon have a water supply which will be all that can be desired, and, more than all, we shall hereafter have an abundant supply of cheap coal. Buffalo is already one of the chief anthracite coal marts in the country. Several of the large Pennsylvania coal companies have established depots here, and the newly-completed railroad facilities will soon give us such advantages in the way of fuel-supply as are possessed by no other city outside of Pennsylvania. We therefore claim the future of Buffalo as a great manufacturing center and distributing point, as assured beyond all doubt. With such a combination of natural, commercial and manufacturing advantages as she possesses, there can be no question that she is destined to become one of the largest inland cities upon the continent. A brief review of what has been accomplished in the past will go far to justify the prediction we so confidently make for the future. And first as to Commerce: In 1872 there was received at this port by lake, from the West, over 62,000,000 bushels of grain (including flour reduced to wheat), and at least 30,000,000 by rail, making an aggregate of at least 92,000,000 bushels. In addition to this we had immense receipts of lumber, live stock and other property, aggregating in value nearly as much as the value of grain. All this had to be handled and most of it forwarded to the world's markets, thus constituting a vast commerce, which must rapidly increase from year to year, as the great West develops and new facilities of transportation are created. Of course there is scarcely any limit to the water facilities which nature has already provided, but they are also being rapidly supplemented by artificial ones. Buffalo is fast becoming a railroad center. We already have the New York Central and Hudson River; the Erie; the Lake Shore and Michigan Southern; the Buffalo, New York and Philadelphia; the Grand Trunk and the Great Western of Canada; and ere long we shall have the Pennsylvania Central, the Buffalo and Jamestown, the Canada Southern, and the Midland, to say nothing of the great Northern Pacific, which, when completed, may legitimately be counted as an important auxiliary to Buffalo growth.

In building great cities and making them attractive to Labor—and through the aggregation of Labor, also attractive to Capital—an enormous expense has necessarily to be incurred in the way of local improvements and enterprises calculated to create local comforts and minister to local pride.

With regard to these Buffalo is already well advanced. In addition to the improvements already mentioned there are many other enterprises equally essential to the attractiveness and comfort of a great city. We have one of the best school systems in the country, embracing a State Normal School in successful operation; we have magnificent City and County buildings in course of rapid erection; also a large edifice for a State Lunatic Asylum, and, last but not least, the speedy building of a first-class hotel—long a desideratum—has just been assured. Nor must we omit to mention our magnificent Park and boulevard system, inaugurated two or three years ago, and so surprisingly pushed forward. This feature of our city improvement is of controlling importance to a great manufacturing city as we expect Buffalo to become, for it is the laboring population more than any other which uses it, and is most directly benefited by it. And not only they but the tax-payers generally are interested in the construction of the Park, as well as in the other enterprises we have just mentioned, to a greater degree than many of them are willing to admit—we mean with reference to taxation which seriously affects rents and the cost of living. Experience has shown that, in this respect, Buffalo has been highly favored. The enterprises we have mentioned have been conceived with foresight, and are being carried on with prudence and economy. The result will be that most, if not all, the cost of them will be reimbursed by the enhanced value of real estate, and by a rapid increase in the permanent growth of our city in population and business.

With these brief retrospections and anticipations we submit our Directory for 1873 to our patrons, confident that the congratulations we extend are fully justified.

BUFFALO

STREET AND AVENUE DIRECTORY.

EXPLANATION.

It will be noticed that in this Street Directory the names of the streets are set down in alphabetical order, giving the course which they run, according, as near as possible, to the points of the compass, and enumerating all streets which cross the same in the order in which they occur. The number on one corner has been given, so that a person wishing to find, say, 495 MAIN STREET, on consulting the Street Directory, finds that the right hand corner of Main and Mohawk is No. 497, consequently the place he seeks is only a few doors above.

BUFFALO FEMALE ACADEMY.

This institution is situated in the most eligible and delightful part of the city, and commands a beautiful view of the city, the river, and the lake. The grounds, consisting of a whole block, fronting on Delaware avenue, and extending to a charming private park in the rear, are tastefully laid out and ornamented with trees and shrubbery.

The buildings, "The Cottage" and "Goodell Hall," combine all that is desirable in arrangement and convenience. The former is built of stone, and is exclusively occupied by the family of the principal, the young ladies entrusted to his care as boarders, and the teachers of the institution boarding with the principal. The latter, "Goodell Hall," has been expressly erected for academic instruction, and for spaciousness and convenience, may well challenge comparison with any similar establishment in the country. It has abundant accommodations for four hundred pupils. Rev. A. T. Chester, D. D., Principal.

VESSEL BUILDING, Etc.

We take the following from Mr. William Thurstone's Report of the Trade and Commerce of Buffalo for 1873:

The tonnage of the 726 vessels of all kinds belonging to the district of Buffalo Creek, on the 30th of June, 1873, was 145,116 tons; 93 vessels were entirely transferred, and 54 vessels, including the propellers Cuba, Java, and Russia, were built and enrolled (with a tonnage of 9,645 tons), during the year 1873. There were also built here in addition, but enrolled in other districts, 1 scow, 3 steam yachts, 10 tug propellers, 1 cable tug, and 3 canal boats, with an aggregate tonnage of about 1,000 tons. After deducting the losses by disasters, during the year 1873, of the tonnage of the Lakes, the increase by reason of the building of new vessels, was about 15,500 tons.

Ship building and the repairing of vessels, is to be actively carried on at all ports around the Lakes, and a large addition to the carrying capacity of the vessels navigating these inland channels of water communication may be expected the coming season. From the best information that could be obtained, 4 schooners at Sheboygan, 4 schooners at Green Bay, 3 schooners, 1 tug and dredge at Toledo, 1 schooner and 2 barges at Sturgeon Bay, 3 schooners at Port Huron, 7 propellers and tugs, and 6 schooners at Detroit, 2 schooners and 2 tugs at Chicago, 3 schooners at East Saginaw, 5 schooners at Milwaukee, 10 schooners, tugs and barges at Cleveland, 2 propellers at St. Catharines, 1 propeller and 2 barges at New Baltimore, 4 schooners and 1 propeller at Oswego, and 30 vessels of different kinds at other places, are reported as being in process of construction, and about 60 to 70 vessels at various places undergoing repairs and alterations.

Two splendid steamers are on their way from England to run in connection with the Canada Southern Railway, between Niagara and Toronto. A revenue cutter, to be built of iron, is in process of construction here; she will be of 200 tons burthen, and draw but $6\frac{1}{2}$ feet of water; fore and aft schooner rigged, without topmasts; her armament will be two 20 pound guns; her dimensions 23 feet beam, and 128 feet long on deck; keel of bar iron, and stern and stern-post of hammered iron; frames, keelson, beams, etc., of angle iron; rigging, galvanized charcoal iron rope. This vessel will be the best iron boat ever built in Buffalo; will be propelled by twin screws; with engines that can be operated either as non-condensing, condensing or compound, as occasion may require; and is intended for service on the coasts of Georgia and Florida. The novelties in construction are numerous, and it is expected that she will be a model for future vessels of this class.

At this port, a dozen canal boats are either in process of construction, or the

timber is being got ready. Eight tug propellers are being built, and one three-masted vessel of 1,000 tons measurement, is nearly finished. At Tonawanda, four schooners of large dimensions will be built, to be ready for the opening of navigation. At Black Rock, two propeller barges and one schooner are building for the iron ore trade; also, one ferry boat to run on the St. Lawrence, and two tugs for river and harbor service; contracts have been entered into to build several tugs by the same parties later in the season.

From statistics it appears that on an average, one vessel passed Fort Gratiot Lighthouse on their way up and down the Lakes last season, every 11 minutes, although on crowded days the average would be one in every 7 minutes.

The estimated value of the vessels of all kinds navigating the Lakes in 1873, was about \$54,000,000; an increase of about \$90,000,000, over the estimate of 1862. A most remarkable enlargement of freight capacity.

C. KURTZMAN,

MANUFACTURER OF THE

MODERN IMPROVED OVERSTRUNG

PIANO FORTE

BATAVIA STREET, CORNER OF ELM.

All our instruments are built of the best and most thoroughly seasoned materials. Their tone is deep, round, full and mellow, the touch elastic. We were

AWARDED THE FIRST PREMIUM

at the New York State Fair, in 1862; also the First Premium at the International Industrial Exhibition, Buffalo, in October, 1869 and 1871; and we claim the right of saying that our make of Pianos is superior to any manufactured in this country.

EXTRACT FROM THE "ROCHESTER UNION."

MR. G. W. ELLIS—Dear Sir: I take much pleasure in saying that the Piano you furnished for Grau's Opera Troupe in this city, manufactured by Messrs. Kurtzman & Hinze, is a very fine instrument—indeed as good as I have ever used.

Yours truly, E. MUSIO,

Musical Director of the Italian Opera.

Every kind of work in our line, as Repairing, Tuning, etc., of Piano Fortes, is done cheap and in the most durable manner.

DE VINE BROTHERS,

SOLE MANUFACTURERS FOR THE

NEWLY IMPROVED SQUARE GRAND

PIANO FORTES

WITH IVORY AGRAFFE.

PATENTED OCTOBER 13, 1868.

Every Piano is warranted for seven years. New and second-hand Pianos Taken in Exchange.

Pianos tuned and repaired. New and second hand Pianos to rent, with privilege of purchase.

No. 401 Niagara Street, corner of Maryland.

We are now offering to the public, Pianos, which for beauty of design, elegance of finish, excellence of workmanship and quality of materials used, are unsurpassed by any in this country. By the use of our

Patent Ivory Bridge and newly constructed Sounding Board,

we get a tone that is more lasting, and vastly superior in its musical quality to any of our competitors, and we challenge the best judges and critics to deny the truth of this assertion.

All of our instruments have every known improvement, and no expense or pains are spared to make them, as we truthfully believe them to be, the best Piano ever offered in this market. Hundreds of persons in this vicinity, who have been using them for the past twelve years, are ready to bear testimony to their sterling qualities—a second-hand one of them being to-day of more intrinsic worth than a new one selected from among the numerous claimants for popular favor in these days of shoddy and deception.

Notwithstanding the high cost of manufacturing these thoroughly First Class Pianos, we are selling them at retail on the most accommodating terms, and at prices that Eastern makers charge wholesale for instruments which in many respects are anything but first class, their reputation being principally derived from the recommendation of unscrupulous agents, who grow fat on the credulity of the too confiding and unwary purchasers.

Please give us a call and be convinced, by examination of the construction of our Pianos, that they are all that we claim for them.

For which we are Agents, and which we unhesitatingly pronounce the best Heating and Ventilating Apparatus for Dwellings, Stores, Churches and Public Buildings in this country. The following is one of the many testimonials in our possession:

BUFFALO, MARCH 30th, 1870.

Messrs. IRLBACKER & DAVIS,

Gentlemen:—I have the "Union Steam Heater," for which you are agents, in my house, and have used it for two years. I regard it as the most perfect heating apparatus with which I am acquainted. The atmosphere of my house is uniform, soft and pleasant, and it is always comfortable as summer. I regard it as an economical apparatus, as far as its consumption of fuel is concerned, and by its use we avoid the sudden and violent changes that are unavoidable in using any Hot Air Furnace that I have ever used or seen.

FRANK & CO.'S PONY PLANER AND MATCHER

This Machine is designed to meet the wants of a large number of those who are in want of a Planer and Matcher, who either have not the means or sufficient amount of planing to afford a large and expensive machine. It is small, strong, compact and durable, occupying a space about $3\frac{1}{2} \times 6$ feet. It has four $4\frac{1}{2}$ inch feed rollers, connected by expansion gears. Both the upper feed rollers and cutter head are raised at the same time by the use of a single crank. The under cutter head is raised and lowered by a screw, to give a light or heavy cut as may be desired. The pressure bar over the lower cutter head is raised by the use of a screw at each end, both being operated at the same time by level gears connecting with a horizontal shaft and crank. It will plane both sides, tongue and groove or joint both sides at the same time from $2\frac{1}{4}$ to 12 inches wide, and do as much work as many machines costing double the price.

PRICES.—To plane and match 12 inch wide, \$375; to plane both sides and match 12 inch wide, \$450; extra cutters per pair, \$4.

ERIE COUNTY CO-OPERATIVE MILK ASSOCIATION

No. 32 ELLICOTT STREET.

The above is an Association of Farmers, chartered under the laws of the State, for the purpose of furnishing milk directly to the consumer, the object being to avoid the ruinous commissions they have been obliged to pay for having their milk marketed under the old system, and to confer an equal benefit upon the consumer by furnishing a pure article.

The Association commenced business in this city May 1st, 1872, and after a year's warfare against the more than usual difficulties incident to a new business, has the satisfaction of announcing that it has become firmly established, and now ranks as one of the permanent institutions of Buffalo.

In case of any failure on the part of the distributing agents to deliver pure milk, or otherwise to fulfill their obligations to their patrons, notice should be immediately given at the office.

NOTICE TO THE TRADE

CONCERNING

JOHNSON'S**BUFF - TINTED COPYING PAPER****CHEAPEST AND BEST PAPER.**

Circulars have been issued to the Stationery Trade, advertising our numerous customers as "unprincipled jobbers and dealers," and threatening them with prosecution, which are doubtless intended to intimidate them against purchasing or using

JOHNSON'S BUFF - TINTED COPYING PAPER

and have gone so far as to state that in some instances our paper has been represented to be another article, made by other parties.

We have bestowed years of labor in bringing our paper to its present perfection, and so far from having any desire to confound it with any other, have labored assiduously to preserve its identity with us.

It is our intention not to permit the trade to be intimidated in the purchase of our Paper. We are able to supply the market with a superior article, at less price than any other, and propose to do so.

If you buy any Copying Paper or Books made by us, we shall protect you against any loss by reason of prosecution or infringement upon the pretended rights of any manufacturer.

Every one of our Copying Books has pasted on the front inside cover a label, reading "JOHNSON'S BUFF - TINTED COPYING PAPER." Then follow a few lines setting forth the advantages of our Paper, with directions for copying, &c.

All our Books are done up in packages of one-quarter dozen each, with a label on the outside of package which reads, "Johnson's Buff - Tinted Copying Paper, Copying Books" size, number and thickness.

Our Buff-Tinted Copying Paper is done up in packages of two Reams each, with label on the outside of each package as follows: "Johnson's Buff-Tinted Copying Paper." This label also contains a list of all the sizes of Paper we manufacture, with other instructions in regard to using this Paper, &c.

We have been somewhat particular in describing the manner in which our Paper and Copying Books are sent out to the trade, so that they may more readily identify them, and understand that we do not wish to confound them with any inferior article.

COTTRELL & BABCOCK'S

IMPROVED

AIR SPRING

PRINTING PRESSES

Office of "THE ALDINE," 58 Maiden Lane.

New York, Nov. 27th, 1872.

Messrs. COTTRELL & BABCOCK.

GENTLEMEN—The two Presses which you placed in our establishment for the printing of our Premium Chromos, "CROSSING THE MOOR," and "VILLAGE BELLE," have so far performed their work in the most admirable manner. The execution of such elaborate and large sized pictures requires the greatest delicacy of distribution and register. No machine with which we are acquainted could meet all the exacting of our work so much to our satisfaction as these have, and the promptness with which we are enabled to meet the unprecedented demand is, in a great measure, due to the admirable mechanism which you have given us.

Very truly,

JAMES SUTTON & CO.

FOR DESCRIPTION SEE NEXT PAGE.

COTTRELL & BABCOCK'S

IMPROVED

Air Spring Presses.

We have recently substituted an Improved Air Spring, for the Wire Spring heretofore in use on our Presses, which enables them to be run at a higher rate of speed, with entire safety and with less noise and jar, and, consequently, with less wear to the machine. Patents were granted on May 4, October 17, and December 12, 1871, to C. B. COTTRELL, for the following improvements on the Air Spring:

FIRST.—A Self-Adjusting or Yielding Plunger, so constructed as to obviate all difficulty from paper, tapes, or other matter falling on the Plunger when the Press is in motion, which has been so productive of damage and delay with the Air Spring as previously made.

SECOND.—We have placed an Automatic Valve in the Plunger, which prevents all strain or drag on the return motion of the Bed, caused by vacuum in the Air Chamber, thereby saving power.

THIRD.—We have applied a Governor, to regulate the amount of Spring according to the speed, which enables the Press to be started at any point without helping it over the centers by hand, a convenience which all press-men will appreciate.

ALLEN'S ROTARY JOB PRESS,

MANUFACTURED BY THE

ALLEN MANUFACTURING COMPANY

PRICE \$800. Counter Shaft, Hangers and Cone Pulley Included.

PRICE \$800. Counter Shaft, Hangers and Cone Pulley Included.

PRINTS A FORM 6x14 AND WILL CARRY A SHEET 14x17 INCHES.

The capacity of this press is from 1,000 to 3,000 impressions per hour; really it is only limited by the ability of the feeder. In strength and perfection of its mechanism, it will compare favorably with the best press in the market.

A. M. CLAPP, Congressional Printer, Washington, writes: "I take pleasure in saying that the Allen Rotary Press fully meets my expectations. It does its work expeditiously and well, and is the best jobber in the office by far. It does the work of fully three Gordon presses, with the feeding expense of one. I shall add another as soon as I find place for it."

GEORGE F. NESBITT & Co., Printers, New York City, write: "Your Fast Rotary is a desirable press for small work. We consider it nearly, if not quite, equal to three Gordon or other similar presses."

D. & C. H. BLAKELY, Proprietors Chicago Evening Post, write: "We have had one of Allen's Rotary Job Printing presses, in operation in our office for several months and are more than satisfied with its operation."

Messrs. WARREN, JOHNSON & Co., Proprietors of the Great Central Snow Printing House, Buffalo, N. Y., speak of the Allen Rotary Job Press as follows: "After a year's severe test of your press averaging from 2,000 to 3,000 impressions per hour, we do not hesitate in pronouncing it one of the very best presses now in market."

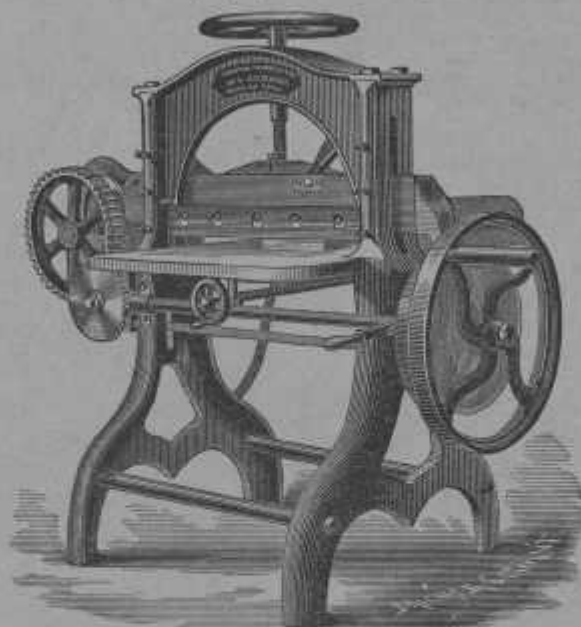

WM. G. ELY, General Agent,

NORWICH, CONN.

THE Champion Paper Cutter

Patented, Aug. 32, 1871. March 19, 1873.

HAND CUTTER, \$275.

POWER CUTTER, \$300.

Cuts 30 inches square and 4 inches in thickness conveniently, and without strain. Is provided with all the improved gauges, the back gauge working from the front. The paper is held down by a clamp by means of a screw through the arch, having a hand wheel upon it. The knife is easily removed for grinding, and is adjustably arranged. The Champion Paper Cutter combines Strength, Efficiency, Simplicity and Durability, and is equal in all respects to other Cutters costing double the money.

MANUFACTURED BY

WM. G. ELY, Norwich, Conn.

CRUMP'S LABEL PRESS, 15 FULTON ST., NEW YORK, Jan. 6th, 1873.

GEN. WM. G. ELY—Sir:—Your three Champion Cutters are at work along side of those of other makers which cost some double and some seven times as much, and are liked fully as well, and in some cases better. Send along the order you now have for a fourth, at your convenience—any thirty days.

Yours truly,

SAMUEL CRUMP.

(From Messrs. Nevins & Myers, State Printers for Ohio.)

COLUMBUS, Ohio, January 2d, 1873.

Send by Express an extra knife for the Cutting Machine we bought of you. We are delighted with your Champion Cutter. It is so simple and easy to work, we have never applied the power to it.

WHY ITS UNPARALLELED SUCCESS? BECAUSE,

- 1st. It is the only truly National Company in the world. Purely Mutual. No Stockholders.
- 2d. The only Company which provides by its Charter for Department Boards of Trustees, and the only Company in whose Constitution this important feature is organic and perpetual.
- 3d. It is purely an Association of Department Constituencies, in which each Department has a direct voice in its general management.
- 4th. It is a home Company in each locality where organized, with the strength of a National one; and it guarantees the investment of the re-insurance fund in the locality where the premiums are collected.
- 5th. The only Company which by its Charter secures to retiring Policy holders a fixed surrender value, for each dollar of premiums paid in.

RESULTS:

The only Company in the World that ever sold \$45,655,000 of insurance the first two years and six months of its existence!

MANUFACTURERS OF

SHINGLE, HEADING, STAVE AND SAW MILL MACHINERY,

Self-Feeding, Self-Tilting, Self-Dogging.
Saws from 3,000 to 5,000 per Hour.

Patented April 17th, 1866.

OUR AUTOMATIC TWO-BLOCK MILL.

This is a machine which we unhesitatingly present to the public as the Best Two Block Mill in use. It is constructed entirely of iron and steel, and in a simple and durable manner. The advantages of this machine are: the LARGE QUANTITY OF WORK turned out, its QUALITY, and the SAVING OF LABOR,—one man tending it easily. The machine is so constructed that when one block is being sawed the other is receding. ELEVATED ABOVE THE SAW, which is done by the tracks upon which the carriage runs being raised and lowered by a simple arrangement not liable to get out of order.

The advantages are, that the saw will run LONGER WITHOUT REPIRING, as the saw comes in contact with the block only when cutting. The block not coming in contact when receding, the upper side of the saw is dulled no faster than the lower, a desideratum not accomplished in any other machine. Any one will readily see that the saw will run much longer before refiling, and also avoid making clipped shingles as in other machines, where one side of the saw becomes duller than the other. It has the advantage of other two block mills in using 40 inch saws instead of 30, and the carriage consequently requiring less distance to travel to cut the same width shingle.

It has the self-acting tilting table operated by the movement of the carriage, and by raising the paul, you make as many shingles as you please one way, if desired.

Awarded the Silver Medal at the Ohio State Fair, Toledo, 1868. Awarded the Silver Medal at the Michigan State Fair, Detroit, 1868. Awarded the Highest Premium at International Industrial Exhibition, Buffalo, N. Y., 1869 and 1871.

We also manufacture Automatic One Block Shingle Machines, Hand Feed Single Block Shingle Machines, Wheel Jointers, Saw Jointers, Planing Machines, Drag Saws, Wood Splitters, Wood Saw Tables, and Saw Mill Machinery, with the Latest Improvements.

STEINWAY & SONS' MAMMOTH MANUFACTORY is the most extensive establishment of its kind in the world.

The Official Revenue Returns show the number of Pianos manufactured by "**STEINWAY & SONS**," viz.:

ONE PIANO EVERY WORKING HOUR!!
TEN PIANOS EVERY DAY!!!

and the amount of their sales are nearly double those of the next largest Manufacturer in America, and exceed those of the Twelve next largest Piano Manufacturers in New York combined.

Steinway & Sons are the only American firm whose Pianos have a "world-wide" reputation, being exported in large and constantly increasing numbers to Europe and all other parts of the civilized world. Steinway's Pianos are sought to be copied by nearly all American and European Pianomakers, many of the latter announcing through the public papers that their Pianos are constructed on the "**Steinway**" system.

Steinway & Sons desire to call special attention to their

NEW PATENT UPRIGHT PIANOS.

with Patent Resonator and Tubular Frame Action, which are Matchless in Volume and Quality of Tone, and surpassing facility of Action and Touch, whilst standing longer in tune, and being more impervious to atmospheric influences than any other Piano at present manufactured. An immense demand has already sprung up for these instruments, which are rapidly becoming

THE AMERICAN HOME PIANOS OF THE FUTURE.

Every Piano Warranted for Five Years.
